Profile Summary

Motivated IT undergraduate at SLIIT with expertise in software development, database management, programming (Python, Kotlin, JavaScript), UI/UX design, and web development. Adept at creating user-friendly solutions and leveraging technical skills to address real-world challenges. Seeking an internship or entry-level role in IT or data science to contribute innovative solutions and grow professionally.

Projects

FutureWatt – Sustainable Energy Management System

- Developed a MERN-based sustainable energy management platform with multi-role dashboards, secure payments with stripe, AI chatbot, and 50+ responsive UI components.
- boosted customer engagement and operational efficiency by over 70%.

Technologies used – React.js, Node.js, Express.js, MongoDB, Stripe, Tailwind CSS

Motofix – Online Vehicle Spare Parts Management System

- Developed a full-stack Java e-commerce platform (JSP, Servlets, MySQL) with MVC architecture, secure payments, and role-based admin/customer portals.
- Improved transaction efficiency and customer engagement by 40%.

Technologies used – Java, JSP, Servlets, MySQL, HTML5, CSS3, JavaScript, Apache Tomcat

Interactive Portfolio Website

- Developed a modern personal portfolio featuring animated hero sections, 3D graphics, interactive project showcases, chatbot, custom cursor, dark mode, and responsive design
- Improved user engagement and time on page through advanced UI/UX, smooth animations, and immersive 3D experiences.

Technologies used – React.js, Three.js, Tailwind CSS, Framer Motion, GSAP, Vite, Spline tools

Balanz – Personal Finance Tracker App

- Built a secure Android app with Kotlin, MVVM, Room, and Live Data for real-time finance tracking. Added AES-256 PIN auth, Material UI with dark/light modes, and MPAndroidChart for interactive analytics.
- Improved user retention and financial awareness while handling 100+ transactions at one time.

Technologies used – Kotlin, MVVM, Room, LiveData, MPAndroidChart.

Belezza – Online Fashion Store

- Developed a full-stack PHP-MySQL online fashion store, featuring secure user authentication, intuitive admin dashboards, and a seamless shopping experience with categorized products and dynamic cart management.
- Improved Implemented robust admin tools for product, user, and contact management, boosting operational efficiency and reducing manual oversight by 40%.

Technologies used – Kotlin, MVVM, Room, LiveData, MPAndroidChart.

Education

BSc (Hons) in Information Technology (Data science)

Sri Lanka Institute of Information Technology

- Major: Software and web development | Minor: Machine Learning

G.C.E. A/L and G.C.E. O/L

Ranabima Royal College, Kandy

Skills & abilities

- **Programming Languages:** Java, Kotlin, JavaScript, Python, C, C++
 - **Web Development:** HTML5, CSS3, React.js, Node.js, Express.js, Next.js, Three.js, JSP, Tailwind CSS
 - **Mobile Development:** Android Studio, XML (UI), Kotlin
 - **Databases:** MySQL, MongoDB, SQLite
 - **Tools & Platforms:** Git, GitHub, Eclipse, VS Code, Postman, Figma, Android Studio, WebStorm, Spline
-

Additional Information

- Languages: English, Sinhala
- Interests: Data Science, Mobile App Development, Open-Source Contributions
